

RAILROAD SERVICES & AAR REPAIRS

WHERE YOU
NEED US, WHEN
YOU NEED US

We are certified through the Association of American Railroads' Quality Assurance (AAR QA) program to handle planned maintenance and inspection in addition to emergency spill and disaster response. Our mobile services respond quickly to minimize OTMA requests, reduce regulatory burden, and keep your freight cars and products moving efficiently.

Rail Services

- Removal and replacement of tank car service equipment and gaskets (AAR M1003 certification with C6 activity code)
- Removal of contaminated and unwanted materials from track beds via hi-rail vac trucks
- Mobile transload and repair units
- Mobile flare service and tank cleaning
- Equipment repairs on railcars containing loaded or residual hazardous and non-hazardous materials

Certifications

- AAR M1002 certification
- NDT Level II certified leak test technicians

Elevated Temperature Mobile Boiler Transfer Systems

- **Performance**—our high efficiency boilers can heat one or multiple tank cars simultaneously
- **Timeliness**—mobile services provided where and when you need them
- **Productivity**—electronically controlled systems optimize efficiency based on commodity being heated
- **Efficiency**—trailer-mounted, self-contained portable boiler systems designed to access tight placed and remote areas
